HOLLAND GROWN HYACINTHS

Hyacinths are of bold strong colors, intense fragrance, firm flower substance and of uniform height. One of Nature's most lavish gifts, they are an integral part of the spring gardens. Few displays can equal their brilliance, few are more welcome after the long winter months. Hyacinths bloom from late March through April, depending on locality. The plants grow from 9 to 12 inches tall, and should be spaced about 9 inches apart. Plant in colonies of a single color for the best effect.

Flowerfield offers large 17 to 18 cm. bulbs packed to our special order in Holland. Bulbs are sold only in units as listed.

NOTE: There is a difference of ten days in the blooming period of certain varieties. We have grouped these under separate headings.

A PLANTING OF HYACINTHS WITH MUSCARI IN THE FOREGROUND

HOLLAND GROWN TULIPS

Tulips bloom from early April to mid-May, according to type. They may be grown in full sun or open shade. In planting, space them 8 to 12 inches apart, preferably in groups of ten or more bulbs of a single color (avoid single rows). For harmony and balance, repeat clumps of the same color in the planting.

BOTANICAL TULIPS
The Tulips of Early April

FOSTERIANA, RED EMPEROR. A huge and magnificent satiny red Tulip measuring at least 8 inches across when fully open. In bloom at least 3 weeks in advance of the Darwin types, they are best planted in clumps by themselves. Height, 16 inches.

12 for $1.55, 25 for $2.60

KAUFMANNIANA HYBRIDS

Earliest to bloom, the attractive flowers nestle in the broad and spreading leaves that are distinctively striped and mottled with purple. These are unique and beautiful Tulips, especially in the rock garden type of planting. They may be left undisturbed for years.

Kaufmanniana, GAIETY. White, striped red on the outside. Height 6 inches. "The Water Lily Tulip."

6 for $1.75; 12, $3.00

Kaufmanniana, SWEELINCK. Bright yellow throughout. Height 8 inches. Striped leaves. Charming flower.

6 for $2.50; 12, $4.50

Kaufmanniana, ALFRED CORTOT. Clear, true red flowers just 6 inches above the broad, spreading, vividly striped leaves.

6 for $2.50; 12, $4.50

Kaufmanniana, RAINBOW MIXTURE. Various colors of red, yellow, white, pink, many unnamed seedlings, creating a lively pattern of color in the early spring.

12 for $2.00; 25, $3.50

DARWIN HYBRIDS

The cross-breeding of Fosteriana X Darwins has resulted in enormous 5 to 6-inch flowers on stiff 26-inch stems. Now, tall Darwin type blooms are to be had in early April.

Darwin Hybrid, OXFORD. Huge vermilion-red illuminated by a clear yellow base. The 6-inch flowers grow 26 inches tall. Also excellent for pots indoors.

6 for $2.25; 12, $3.75

Darwin Hybrid, GUDOSCHNIK. Buff streaked and dappled with rose-red, the coloring of a ripened peach; the interior a shining gold. Huge 5 to 6-inch blooms in late April. Height 28 inches. 6 for $2.25; 12, $3.75

EARLY-TRIUMPH TULIPS

In bloom ten days ahead of the Darwin Tulips, but with flowers just as large, this strain, because of the shorter stems, can withstand the strong winds prevalent in some areas of the garden. They are also suited for forcing.

BELLONA. Large, deep yellow oval-shaped blooms, sweetly scented and long lasting on plants 18 inches high are superb when massed in the borders. Also ideal for forcing.

6 for $1.10; 12, $1.75; 25, $3.15

BLIZZARD. Pure white globular flowers of heavy waxlike texture on sturdy 18-inch stems. New and exciting.

6 for $1.65; 12, $2.85; 25, $5.25

AMARYLLIS
Royal Dutch Hybrids

As illustrated and described on the back cover, the Royal Dutch Hybrid Amaryllis in the NAMED VARIETIES are a great advance in floriculture. FLOWERFIELD was the first, in this country, to offer these fabulous new WARMENHOVEN introductions.

Each of these named varieties have fixed characteristics related not only to color but to habit of growth and blooming periods. These fixed characteristics are achieved not by raising from seed but by a slow vegetative process which takes almost 4 years to produce the top-sized bulbs that are offered here.

These top-sized bulbs produce at least 2 stalks of bloom, one following the other within three weeks. Bulbs are used over again for many years, increasing in size and gradually developing natural offsets.

Royal Dutch Hybrid AMARYLLIS, MARS

AMARYLLIS *Royal Dutch Hybrids*

FLOWERFIELD proudly offers the new, rare and internationally famous Warmenhoven strain of Royal Dutch Hybrid Amaryllis, sent to us direct from the Warmenhoven greenhouses in Holland. A departure from the older types, they are truly magnificent in flower form. Measuring at least six inches across, they are broad and flattened rather than bell-shaped. The colors are brilliant and clear, and somewhat luminous because of a delicate crepe-like surface. The tall strong stalks hold 4 to 5 blooms aloft; some as high as 40 inches, according to the individual characteristics of a variety (they vary not only in color and height but also blooming period). For further details, see page 15.
